

Method of installing Microsoft(R) .NET Framework and Microsoft Data Access Components

1. Introduction

When the following window is displayed during installation, it is necessary to install Microsoft(R) .NET Framework and Microsoft Data Access Components (MDAC) on your computer according to the following procedure.

(If OS is Windows Vista, it is not necessary.)

If your computer is connected to the Internet, you can install Microsoft(R) .NET Framework and Microsoft Data Access Components from Microsoft Web Site.

Confirmation method of software which installation is necessary

Select [Add or Remove Programs] from the Control Panel.

- * In Windows 2000, select [Add/Remove Programs].
- * In Windows Vista, select [Uninstall a program].

If the following programs are displayed in the list and (Version) is 2.0 or later, NET Framework has been installed.

- Microsoft(R) .NET Framework (Version)
- Microsoft(R) .NET Framework (Version) (Language) Language Pack *

Then it is necessary to install Microsoft Data Access Components (MDAC) 2.81 or later on your computer.

* If Microsoft(R) .NET Framework (Version) which includes English resource has been installed, Microsoft(R) .NET Framework Language Pack is not displayed in English version OS.

2.Installation Method

If the following link is clicked, it jumps to Microsoft Site (United States).

[.NET Framework 2.0 Download](#)

[.NET Framework Version 2.0 Language Pack DownLoad](#)

[Microsoft Data Access Components\(MDAC\)2.8 SP1 Download](#)

Change language as needed and download the software.

Logon as the user of administrator authority and install it.
