Flow of Customizing the Wallpaper

About changing the wallpaper of Home screen, the wallpaper of Phone screen and the logo of Phone screen, these work in same flow.
conf

1. Prepare an image file and put the file on a Web server.

2. Specify URLs of the image file using the following parameters in a configuration file.
   - WALLPAPER_URI_HOME
   - WALLPAPER_URI_PHONE
   - LOGO_URI_PHONE

3. Import the edited configuration file. After that, KX-UT670 will reboot.

5. Access to the Web server

6. Get the image file

Web server

4. At the reboot, KX-UT670 parse the configuration file and get the URL on which the image file is put.

7. Set the image file as the wall paper or Logo of the Phone screen.

Note:

When it changes the wallpaper or the logo again,
- new image file with another name needs to be put on the Web server.
- the name needs to be specified in the configuration file.

Settings for changing the Wallpaper or the Logo

You can set whether the user can change the wallpaper of the Home screen and the wallpaper of the Phone screen via phone user interface programming.

---

1. Press `☰ Menu` on the Home screen, and then tap **[Settings].**

2. Tap **[Administration],** enter the administrator password, and then tap **[OK].**

3. Tap **[Customize].**

4. Specify [**Specify through configuration file], [Forbid change of the home screen wallpaper],** or **[Forbid change of the phone screen wallpaper.]**

Note:
- When a value has been specified (anything other than an empty string) for "WALLPAPER_URI_HOME" or "WALLPAPER_URI_PHONE" through configuration file programming, and **[Specify through configuration file]** is selected, users cannot change the wallpaper of that screen.

- If **[Specify through configuration file]** is selected, **[Forbid change of the home screen wallpaper]** and **[Forbid change of the phone screen wallpaper]** will be grayed out.
