These instructions contain information on operating the scanner. Before reading these instructions, please read the installation manual enclosed with this unit.

Please carefully read these instructions and the enclosed Installation manual. Keep all documentation in a safe place for future reference.
Introduction

Thank you for purchasing a Panasonic Document Scanner.

Precautions

Installation

• Do not place the unit in direct sunlight, in a cold draft, or near heating apparatus.
• Do not place the unit near apparatus which generate electronic or magnetic noise.
• Protect the unit from static electricity.
• Do not move the unit immediately from a cold place to a warm place. It may cause dew.

CD-ROM

• Do not write or stick paper on the front and/or back of CD-ROM.
• Do not touch the data side of the CD-ROM. When handling the CD-ROM, be careful not to leave fingerprints or otherwise damage the CD-ROM.
• Do not leave the CD-ROM where it is directly exposed to sunlight or near a heater for extended periods.
• Do not throw or bend the CD-ROM.

Roller Cleaning Paper (sold separately)

• Keep the roller cleaning paper out of reach of small children.
• Do not store the roller cleaning paper in direct sunlight or in a place with a temperature over 40 °C (104 °F).
• Only use the roller cleaning paper to clean the rollers.
• For details about the roller cleaning paper, please refer to the Material Safety Data Sheet (MSDS). Please ask your Panasonic sales company about obtaining the Material Safety Data Sheet.

KEEP AWAY FROM FIRE.

Others

• Make sure to remove paper clips and staples from documents before scanning. Failing to do so can damage the unit, document, or both.
• Do not use thinner, benzine, or cleaners containing abrasives or surfactants, for cleaning the outside of scanner.
• Plug the power cord into an outlet from which you can easily unplug it.
Illegal Duplication

It is unlawful to make duplication of certain documents. Duplicating certain documents may be illegal in your country/area. Penalties of fines and/or imprisonment may be imposed on those found guilty. The following are examples of items that may be illegal to duplicate in your country/area.

• Currency
• Bank notes and checks
• Bank and government bonds, and securities
• Passports, licenses, official or private documents, identification cards, and the like
• Copyright materials, or trademarks without the consent of the owner
• Postage stamps, and other negotiable instruments

This list is not inclusive, and no liability is assumed for either its completeness or accuracy. In case of doubt, contact your legal counsel.

Notice

Install your machine near a supervised area to prevent illegal duplication from being made.

Security Notice

The management of documents and scanned data is the responsibility of the user. In particular, pay attention to the following points.

• Make sure you have the same number of pages for important documents both before and after scanning, and take care not to leave any pages in the scanner.
• Periodically back up important data.
• When having your computer or hard disk serviced, or when disposing of your computer or hard disk, completely erase any stored image data.
Main Unit

Front

1. Document guides
2. Door open button
3. ADF door
4. Exit tray
5. Exit extension tray
6. Exit stopper
7. Exit guides
8. Scanning lamps
9. Control Panel
   For details, refer to "Control Panel and LED Indicators" (page 9).
10. Security slot
    Use a commercially available security cable.
11. LED (Red) / LED (Green)
    Shows the scanner’s status. For details, see "Control Panel and LED Indicators" (page 9).
12. Feed tray
13. Feed extension tray
14. Manual feed selector
    Selects the scanning method from continuous scanning (Auto) or manual scanning (Manual).
Rear

1 Mixed batch card guide
2 Power connector
3 AC adaptor
4 Power cord
   Plugs may vary in shape depending on country/area.
5 USB cable
6 USB connector
Control Panel and LED Indicators

1. **LED (Red)**
   Shows the scanner’s status.

2. **LED (Green)**
   Shows the scanner’s status.

3. **Power key (켜기)**

4. **Skip key (Skip)**
   - If you press this key when a double feed occurs, the document that was detected as a double feed will be scanned, and scanning will continue.
   - If you press this key after a dog-eared document is detected and scanning pauses, the document will be scanned, and then ejected from the scanner. Scanning will continue after the dog-eared document is scanned and ejected.

5. **Start/Stop key (Start/Stop)**
   - If you set [Wait Key] for “Manual Feed Mode”¹ in your application software, pushing this key starts scanning.
   - During scanning, pushing this key stops scanning.
   - If you press this key when a double feed occurs, the document that was detected as a double feed will not be scanned. Scanning will stop.
   - If you press this key after a dog-eared document is detected and scanning pauses, the document will be ejected from the scanner without being scanned. Scanning will stop.

¹ For details on "Manual Feed Mode", refer to the help for ICP.
## About LED

¹ If no operation is performed for 30 minutes or longer, the scanner will be turned OFF automatically. The time until the scanner turns OFF can be changed with the User Utility.
Turning on the Scanner Power

1. Press the power key (①) of the scanner to ON.

- The LED (Green) will blink, and then it will become steady.
- To turn OFF the scanner power, press and hold the power key for one second or more.
Starting the Scanner Applications Automatically

The scanner application can be configured to start automatically when pressing the Start/Stop key, and/or placing documents on the feed tray. To accomplish this, follow the steps below.

Setting the event

1. Click [Start], and then click [Control Panel].
2. Select your scanner in the [Scanners and Cameras], and then display the scanner property dialog box by right clicking on the scanner icon.
   • In Windows Vista, select your scanner in [Scanners and Cameras Properties], and then display the scanner property dialog box by clicking [Properties] button.
   • In Windows 7, select your scanner in [Devices and Printers], and then display the [Scan properties] dialog box by right clicking on the scanner icon.
3. Click the "Events" tab.
4. Select an event in the "Scanner events" list. The selected event activates a scanner application.

   - The following events can be selected.

<table>
<thead>
<tr>
<th>Event</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Feeder Loaded&quot;</td>
<td>An event occurs when placing documents on the feed tray.(^1)</td>
</tr>
<tr>
<td>&quot;Start Button&quot;</td>
<td>An event occurs when pressing the Start/Stop key of the scanner.</td>
</tr>
</tbody>
</table>

\(^1\) When the scanner is in Sleep mode, press the Start/Stop key to return it to Ready mode.
5. Select the check box of the desired scanner applications corresponding to the selected event in the "Send to this application" list.

- To disable the automatic activation of the scanner applications, set the "Disable device events" check box to on.

6. Click [OK].

**Note**
- When multiple applications are selected in the "Send to this application" list, the "Choose Application" dialog box will display, prompting you to select an application in the "Registered Applications" list. After an application has been selected, it starts. If only one application is selected, that application will be launched automatically.

7. Restart your computer.
Preparing Documents

Acceptable Documents

The acceptable documents for this scanner are as follows.

**Document size:**
- 48–216 mm (1.9–8.5 in.)
- 70–2,540 mm (2.8–100 in.)

**Paper thickness:** 20–209 g/m² (5.4–55 lb.)
- The height of all the documents on the tray should be less than 7.5 mm (0.3 in.). This compares to 75 sheets (80 g/m² or 20 lb.) of new paper.
- With the exception of ISO format cards, the minimum guaranteed feeding length is 70 mm (2.8 in.).
- Single paper feeding is recommended for papers exceeding the legal size length.
- When thin documents of 40 g/m² (10.7 lb.) or less are scanned, we recommend that the feed speed is set to “Slow”. The feed speed can be set to “Slow” in the TWAIN driver, the ISIS driver, or in Image Capture Plus. For details, refer to the help of each piece of software.

Recommended paper: Plain paper

Acceptable cards

**ISO format card:**
- Size: 85.6 x 54 mm (3.4 x 2.1 in.)
- Thickness: 0.76 mm (0.03 in.)

**Embossed card is also acceptable.**
- A maximum of 3 cards can be loaded on the feed tray.
  The height of the total cards (the total thickness including the embossing on each card) should be less than 5 mm (0.2 in.). Additionally, the embossing on each card must not get entangled with others.
- **Use the landscape orientation when scanning an embossed card.**
  If the scanning fails, place the card upside down, and then try again.
- **Use the mixed batch card guide (page 24) when scanning mixed media (cards and papers) at the same time.**
Unacceptable Documents

The following types of documents may not scan properly:

• Curled, wrinkled or folded documents

Documents must also meet the following conditions.

<table>
<thead>
<tr>
<th>Curl</th>
<th>Feeding direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 5 mm (0.2 in.)</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Folding</th>
<th>Feeding direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 5 mm (0.2 in.)</td>
<td></td>
</tr>
</tbody>
</table>

• Carbon paper
• Thick or irregular documents such as envelopes
• Perforated or punched paper
• Non-rectangular or irregularly shaped paper, such as document with tags
• Coated paper
• Torn or frayed documents
• Extremely smooth, shiny paper, or paper that is highly textured
• Carbonless copy paper
• Transparent or partially transparent documents such as OHP sheet and tracing paper
• Photographs¹

¹ Photographs may become scratched or damaged, etc.

Do not scan the following types of paper:

• Damaged or notched document/card
• Documents out of specified size, thickness, and weight
• Documents containing hard attachments such as metal or plastic (ex. clips or staples)
• Bound or glued documents
• Cloth and plastic films
• Document with wet ink or cinnabar seal ink
• Thermal or photosensitive paper
• OHP sheets, other plastic films, or metallic sheets
Notes about documents for scanning

• Depending on the paper type, scanning results may be poor when you scan unacceptable documents, or even documents that should be acceptable. If a paper jam or double feeding occurs, try scanning again after doing the following:
  – Clean the rollers and sensors.
  – Reduce the number of sheets of paper loaded on the feed tray.
  – Use slow mode.
    Slow mode can be used by enabling the slow mode of the TWAIN driver, the ISIS driver, or Image Capture Plus. For details, refer to the help of each piece of software.
  – When scanning a document using manual scanning, feed the document 1 page at a time.
• If paper jams occur at the exit slot, remove the exit guides and then scan the documents. For details about removing the exit guides, refer to the step 4 in "Repacking Instructions".

Notes about double feed detection

• This scanner is equipped with an ultrasonic sensor to detect double feeding. The width of documents that can be detected is 140 mm (5.5 in.) or larger.

Notes about dog-ear detection

• This scanner is equipped with a dog-ear detection function. Documents must be no larger than 210 mm (8.3 in.) in width and 355.6 mm (14 in.) in length in order to use dog-ear detection.
Scanning Documents

Notice

- Make sure to remove paper clips and staples from documents before scanning. Failing to do so can damage the unit, document, or both.

- Curled documents may cause a paper jam or damaging the document, therefore, set the document flat before scanning.
- When scanning important documents, confirm that the number of scanned images matches the number of pages in the document. Also, check the condition of scanned documents.
- Remove documents from the exit tray after they have been scanned.
- Unsupported thin paper types may not exit at the exit slot correctly.

1. Press the door open button (①), and open the ADF door (②).
2. Use the manual feed selector (①) to select continuous scanning (Auto) or manual scanning (Manual).

**Continuous scanning (Auto)**
Push the manual feed selector in the direction indicated by the arrow.

**Manual scanning (Manual)**
Pull the manual feed selector in the direction indicated by the arrow.

**Notice**
- When scanning a document manually (Manual), feed the document 1 page at a time.
- When scanning important documents or bound documents, feed them manually (Manual).
- When scanning a document manually (Manual), disable the double feed detection function. To disable the double feed detection function, set this function of the TWAIN driver, the ISIS driver or Image Capture Plus to disable. For details, refer to the help of each piece of software.
3. Close the ADF door.
   • Push both sides of the ADF door down slowly until it clicks into place.

4. Fan the documents.
   • Documents that have been stapled together or stacked together (as in a file folder) will need to be separated.
     1. Fan the stack of documents to separate all the edges.
     2. Hold both ends and bend the documents as shown in the illustration.
     3. To flatten the documents, hold firmly and pull them apart as shown in the illustration.

Repeat these steps as necessary.
5. Adjust the document guides (①) slightly larger than the actual size of the documents.

6. Carefully align the documents.
   - The documents feed better when the leading edges are aligned slantwise as shown in the illustration.
7. Place the documents on the feed tray with the side to be scanned facing down.
   • Set the leading edge of documents as shown in the illustration (1).

![Diagram showing documents being placed on the feed tray]

**Note**

- Place the documents as shown in the illustration.
- The height of all the documents on the tray should be less than 7.5 mm (0.3 in.). Exceeding this height might cause paper jams or skewing.

8. Adjust the document guides (1) to the size of the documents to be scanned.

![Diagram showing document guides being adjusted]

9. Open your scanning application*1 and scan the documents.

   *1 The software Image Capture Plus (ICP), included with the scanner, can be used for scanning the documents.
Clearing Paper Jams

If a paper jam occurs, the message “A paper jam has occurred” and an error code (Uxx) is displayed in the User Utility application. Remove the jammed sheet according to the following instructions.

Removing paper jams from the feeding section

1. Remove all documents from the feed tray.

2. Press the door open button (①), and open the ADF door (②).

3. Remove the jammed document.
   • If the document is jammed in the feed tray area, pull it backwards as shown in the illustration.
- If the document is jammed in the exit area, pull it forward as shown in the illustration.

4. Close the ADF door.
   - Push both sides of the ADF door down slowly until it clicks into place.
Mixed Batch Card Guide

No adjustment to the document guide is required when using the mixed batch card guide. The mixed batch card guide prevents a card from skewing when scanning paper documents and a card simultaneously.

Installing the mixed batch card guide

Install the mixed batch card guide as shown in the following illustration.

Using the mixed batch card guide

Set paper documents on the feed tray, and a card on the mixed batch card guide respectively.

• The card set on the mixed batch card guide is fed after completing the paper document scanning.
• The mixed batch card guide is suitable for the following card.

  **ISO format card:**
  
  Size: 85.6 x 54 mm (3.4 x 2.1 in.)
  Thickness: 0.76 mm (0.03 in.)

  Embossed card is also available.

• Set the card horizontally.

Note

• When using the mixed batch card guide, the document guides cannot be adjusted to less than A5 size.
• Set only one card at a time.
• Make sure that the total height of the paper on the feed tray does not exceed 2 mm (0.08 in.). This is equivalent to about 20 sheets at 80 g/m² or 20 lb.
Using Control Sheets

By using control sheets, you can change the scanning conditions in the middle of scanning. Placing a control sheet in the middle of a document lets you change the scanning conditions for all pages scanned after the control sheet.

**Print out control sheets from the provided CD-ROM.**

**Control sheet functions**
Simplex, Duplex, Binary, 256 level gray, Color, Dynamic Threshold, Dither, Error diffusion, Function #1–#9, Separation Sheet

**Note**
- Multiple control sheets can be used.
- To use control sheet functions, your scanning application must support control sheets. When using control sheets, refer to the instruction manual of your scanning application.
About Printing Control Sheets

• Print the control sheet at the specified size; do not enlarge or reduce the size.
• When printing the control sheet, make sure that the pattern is 25 mm (1 in.) from the top of the page and centered horizontally.

Center of the page

25 mm
(1 in.)

<Example A4 printout>

• Use the control sheet that is the same size as the document you are scanning.
• Be careful not to get the control sheet dirty. Do not fold or crease the control sheet. Scanning will not be performed properly.
• For details on control sheet and separation sheet, refer to section "Detect Control Sheet" in the help for PIE.

Printing control sheets

Note
• In order to print control sheets, Adobe® Reader® must been installed on your computer.
• Refer to the instruction manual for your printer for details about changing print settings.

1. Insert the CD-ROM into the CD/DVD drive on your computer.
   • If you have a feature called "Autorun" activated, the installation process will start automatically.
   • The setup window will appear.

   Note
   • If the AutoPlay dialog box is displayed in Windows Vista or Windows 7, select "CDRun.exe".
   • If the program does not start automatically, from [My Computer] ([Computer] in Windows Vista or Windows 7), select the CD/DVD drive, and then double-click "CDRun.exe".

2. Select your scanner.

3. Select [Control Sheet] from the "Manuals" list on the right side of the screen.

4. Print the control sheets at the same size as your document.
Cleaning the Scanner

Outside of the Scanner

Notice

- Do not use thinner, benzine, or cleaners containing abrasives or surfactants, for cleaning the outside of the scanner.
- Clean the scanner at least once a month.

1. Press and hold the power key for one second or more to turn off the scanner power.
2. Clean the cover with a soft cloth.
Inside of the Scanner

- Clean the scanner at least once a week or when 2,000 sheets have been scanned, whichever comes first.
- Clean the rollers and sensors if paper jamming or double feeding occurs frequently.
- If double feed detection does not function properly, clean the double feed detectors.
- Clean the scanning glass area and reference area when black or white lines appear on the scanned images.
- If the documents you are scanning are dirty, then the scanner parts will also become dirty. To maintain proper scanning, clean the scanner parts frequently.

About the roller cleaning paper (sold separately)

Open the roller cleaning paper on the dotted line (①), and take out the roller cleaning paper.

Notice

- Keep the roller cleaning paper out of reach of small children.
- Do not store the roller cleaning paper in direct sunlight or in a place with temperature over 40 °C (104 °F).
- Only use the roller cleaning paper to clean the rollers.
- For details about the roller cleaning paper, please refer to the Material Safety Data Sheet (MSDS). Please ask your Panasonic sales company about obtaining the Material Safety Data Sheet.

Note

- If the bag is left opened for a long period of time before using it, the alcohol will evaporate. Please use the roller cleaning paper immediately after opening the bag.
- To purchase roller cleaning paper (KV-SS03), you can contact the dealer where the scanner was purchased, or you can call our Supplies and Accessories department at 1-800-726-2797 (U.S.A. only).
Cleaning the Rollers

1. Press and hold the power key for one second or more to turn off the scanner power.

2. Press the door open button (A), and open the ADF door (B).

3. Open the paper feed roller cover (green) (①).
4. Use the separately sold roller cleaning paper (KV-SS03) to remove the dirt from the surface of all rollers.
   • When wiping off dirt from the roller surface, hold the roller to prevent it from rotating. Wipe the roller from one end to the other in the direction indicated by the arrow, all the way around, as shown in the illustration.

5. Close the paper feed roller cover (green) firmly.
   • Make sure to close both sides of the paper feed roller cover (green) until they click into place.
6. Use the roller cleaning paper to clean the surface of the double feed prevention roller.
   • Wipe the roller from one end to the other (in the direction of the arrow) all the way around them, as shown in the illustration.

7. Use the roller cleaning paper to clean the surface of the conveyor rollers (①) and exit rollers (②).
   • Wipe the rollers from one end to the other (in the direction of the arrow) all the way around them, as shown in the illustration.
8. Use the roller cleaning paper to clean the surface of the free rollers (1).
   • Wipe the rollers from one end to the other (in the direction of the arrow) all the way around them, as shown in the illustration.

9. Close the ADF door.
   • Push both sides of the ADF door down slowly until it clicks into place.

10. Reset the roller cleaning counter in User Utility to 0.
    • Turn ON the scanner power.
    • Start User Utility, and in the window, click the [Clear Counter] button for “After Clean Roller” to reset to counter to 0.
    • For details, refer to the User Utility help.
Cleaning the Scanning glass, Reference area, and Double feed detectors

Notice
- Do not use the roller cleaning paper for cleaning the scanning glass, reference area, or double feed detectors.

1. Press and hold the power key for one second or more to turn off the scanner power.

2. Press the door open button (①), and open the ADF door (②).

3. Clean the scanning glass area (①) and reference area (②) using a soft and dry cloth.
4. Remove dust on the double feed detectors (①) with a cotton swab.

5. Close the ADF door.
   • Push both sides of the ADF door down slowly until it clicks into place.
Replacement Parts and Optional Units

<td>KV-SS03</td>
<td>See &quot;About the roller cleaning paper (sold separately)&quot; (page 28).</td>
</tr>
</tbody>
</table>

**Note**

- To purchase replacement parts or optional units, please contact your dealer.

The double feed prevention roller and the paper feed roller are consumables. Please purchase the "Roller exchange kit (KV-SS058)", and replace each roller periodically.

The usable life of each roller is as follows:

- Paper feed roller / Double feed prevention roller: 100,000 sheets

The scanner counter can be confirmed by using the User Utility.
Replacing Parts

If double feeding or paper jam occurs frequently even after cleaning the roller (page 29), please call your dealer to order a "Roller exchange kit (KV-SS058)", and replace the double feed prevention roller, and paper feed roller.

Replacing the Rollers

1. Press and hold the power key for one second or more to turn off the scanner power.

2. Press the door open button (①), and open the ADF door (②).

3. Open the double feed prevention roller cover (green) (①).
4. Remove the double feed prevention roller (①).

5. Take out the new double feed prevention roller in the optional "Roller exchange kit (KV-SS058)".

6. Install the new double feed prevention roller into the metal holder with the longer groove facing to the right-side (rear view).
7. Close the double feed prevention roller cover (green) (①) firmly.

Notice
- Be sure to close the double feed prevention roller cover until it clicks into place.

8. Open the paper feed roller cover (green) (①).
9. Remove the paper feed roller (①).

10. Take out the new paper feed roller in the optional "Roller exchange kit (KV-SS058)".

11. Install the new paper feed roller with the gear on the left side.
12. Close the paper feed roller cover (green) firmly.

Notice
- Make sure to close both sides of the paper feed roller cover (green) until they click into place.
- After installing the paper feed roller, confirm that the paper feed roller can rotate in the feeding direction.

13. Close the ADF door.
- Push both sides of the ADF door down slowly until it clicks into place.

14. Reset the roller replacing counter in User Utility to 0.
- Turn ON the scanner power.
- Start User Utility, and in the window, click the [Clear Counter] button for "After Replace Roller" to reset the counter to 0.
- For details, refer to the User Utility help.
Troubleshooting

If a problem occurs while the scanner is being used, check the following items and check the scanner status with User Utility. If the unit still malfunctions, turn it OFF, unplug the power cord from the AC outlet, and call for service.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>The ready indicator does not light when the power key is turned ON.</td>
<td>The power cord is not plugged in.</td>
<td>Insert the power plug firmly.</td>
</tr>
<tr>
<td></td>
<td>Problem with the AC adaptor.</td>
<td>Unplug the power cord from the AC outlet, and call for service.</td>
</tr>
<tr>
<td>The computer does not recognize the scanner. The scanner is not functioning correctly.</td>
<td>The scanner is not connected to the computer correctly.</td>
<td>Connect the USB cable correctly.</td>
</tr>
<tr>
<td></td>
<td>The software is not installed correctly.</td>
<td>Uninstall the software from the computer, and then install the software again. (Refer to &quot;Installing Software&quot; in the Installation Manual.)</td>
</tr>

If you still experience problems after following these suggestions, please contact our Technical Support Department at 1-800-726-2797 for further assistance (U.S.A. only).
Repacking Instructions

It is highly recommended that you keep the original carton and ALL packing materials. If you need to transport or ship the scanner, please follow these instructions.

**Note**
- Improper repacking of the scanner may result in a service charge to repair the scanner.
- Please use the original carton and all of the original packing materials.
- The scanner should be handled in the correct (horizontal) position.

**Required Materials**
- Original scanner carton and packing materials
- Shipping tape and scissors

1. Press and hold the power key for one second or more to turn off the scanner power.
2. Unplug the power cord from the outlet, and remove the AC adaptor and USB cable from the scanner.
3. Remove the feed tray from the scanner.
   - Lift up the feed tray to unlock, and then pull the left (①) and right (②) sides out of the scanner in that order.

![Diagram of how to remove the feed tray]

Appendix
4. Remove the exit guides (①) from the scanner.
   • Tilt the scanner up and set it on its back side (①), and then remove the exit guides.

   ![Diagram of scanner with exit guides removed]

**Note**

   • Attach the exit guides (①) in the following manner:
     – Tilt the scanner up and set it on its back side (①), and then attach the exit guides into the 2 grooves (② and ③).
Attach the exit guides with the rounded area facing downwards as shown (④).

5. Put the USB cable, CD-ROM, feed tray, exit guides, power cord, and mixed batch card guide into the accessory box.
6. Pack the scanner.

① Installation Manual
② AC adaptor
③ Power cord
④ USB cable
⑤ Drivers & Utilities / Manuals CD-ROM
⑥ Exit guides
⑦ Feed tray
⑧ Mixed batch card guide

</tbody>
</table>

*1 The scanning speed differs depending on the host computer, operating system, application, measuring method, the data quantity of the image, and paper type. The scanning speed was measured using a proprietary method.

*2 Although you can specify other paper sizes, scanning quality cannot be guaranteed.

*3 Embossed card is also available.

*4 The life of the scanner and the rollers is the estimated value when using the A4 or Letter sized standard paper (64 g/m² or 80 g/m² [20 lb.]). It may vary depending on the kinds of paper, usage and cleaning intervals.

"Weight in pounds" of paper represents the weight of 500 (432×559 mm [17×22 in.]) sheets.
